Per una protezione supplementare si consiglia l'utilizzo delle apposite coperture nella stagione invernale, alla sera, o in caso di piogge frequenti.
Per la manutenzione consultare la scheda uso e manutenzione a partire da pagina 221 del presente listino.

For additional protection, we recommend the use of our covers in winter season or in the evening, mainly in rainy periods.
For maintenance, consult the use and maintenance sheet starting from page 221 of this price list.

Per una protezione supplementare si consiglia l'utilizzo delle apposite coperture nella stagione invernale, alla sera, o in caso di piogge frequenti.
Per la manutenzione consultare la scheda uso e manutenzione a partire da pagina 221 del presente listino.

For additional protection, we recommend the use of our covers in winter season or in the evening, mainly in rainy periods.
For maintenance, consult the use and maintenance sheet starting from page 221 of this price list.

Materials

Alluminio: Grazie alla fusione di più leghe di alluminio che ne garantiscono solidità, maneggevolezza ed inattaccabilità alla ruggine, è un materiale di elavata qualità e permette di raggiungere i massimi risultati qualitativi ed estetici.
Inox: L'acciaio inossidabile è un materiale che, grazie alla sua alta resistenza alla corrosione e alle caratteristiche meccaniche di rilievo, risulta maggiormente duraturo e affidabile nel tempo.
Acciaio: Lega di ferro e carbonio con percentuale di carbonio inferiore al 2% trattata per resistere agli agenti atmosferici con il processo della cataforesi e verniciatura a polvere.

Manutenzione: Per mantenere a lungo il prodotto in buone condizioni, consigliamo una corretta pulizia periodica, particolarmente frequente in località caratterizzate da forte umidità e clima marino. Si raccomanda di pulire le superfici con un panno morbido utilizzando acqua o detergenti neutri. Prolungate ed ininterrotte esposizioni a intense radiazioni UV o a temperature molto rigide possono incidere sulle caratteristiche iniziali del rivestimento estetico colorato costituito da poliestere. Consigliamo di pulire e conservare in luoghi riparati i prodotti durante periodi d'inutilizzo prolungato e invernali.

Aluminum: Thanks to the fusion of several aluminum alloys that guarantee solidity, manageability and rust resistance, it is a material of high quality and allows to reach the maximum qualitative and aesthetic results.
Inox: Stainless steel is a material that, thanks to its high resistance to corrosion and to the mechanical characteristics of relief, is more durable and reliable over time.
Steel: Iron and carbon alloy with carbon percentage less than 2% treated to resist to the atmospheric agents with the cataphoresis process and powder coating.

Maintenance: To keep the product in good condition for a long time, we recommend a regular cleaning period, particularly frequent in places characterized by high humidity and marine climate. We recommend cleaning the surfaces with a soft cloth using water or neutral detergents. Prolonged and uninterrupted exposures to intense UV radiation or at very low temperatures can affect the initial characteristics of the colored polyester coating. We recommend cleaning and storing products in sheltered areas during long periods of non-use and winter.

Materials

Legni / **Wood**

Teak

Accoya natural teak colour

Smoke teak

Accoya iroko colour

Natural teak

Accoya stonewood colour

Accoya palissandro colour

Teak palissandro colour

Teak: Materiale di elevata qualità ideale per la realizzazione di mobili da esterno perché estremamente resistente ai cambiamenti di temperatura, all'acqua, all'umidità e alla salsedine.
Accoya è una nuova varietà di legname di eccezionale durabilità, questo legno dalle elevate prestazioni viene prodotto con materie prime sostenibili e gestite in maniera ottimale, non è tossico ed è inoltre dotato di una stabilità dimensionale e di una durabilità in grado di superare quella dei migliori legni duri tropicali.

Trattandosi di un materiale naturale si potrebbero osservare variazioni di colore o anche crepe dovute al grado di umidità ed ai bruschi cambiamenti di temperatura. Qualora non ricevesse alcun trattamento di manutenzione, mediante l'applicazione periodica di comuni e specifici protettivi a base olio, la superficie potrebbe prendere una patina grigio argento che potrà essere eliminata con una leggera carteggiatura superficiale e successiva lucidatura con panno di iuta. Piccole macchie superficiali dovute ad olio o altri prodotti alimentari dovranno essere rimosse tempestivamente, prima che il legno possa assorbirle in profondità, carteggiando la superficie interessata e lucidandola successivamente con un panno di iuta.

Teak: High quality material suitable for outdoor furniture because it is extremely resistant to changes in temperature, water, humidity and saltiness.
Accoya is a new variety of wood characterized by an exceptional durability. This wood shows very good performances and is produced with sustainable row material, managed in an optimal way. It is not toxic and it has got a dimensional stability. Its durability is much higher than the one of the best hard tropical wood.

Being a natural material, colour variations or even cracks due to the degree of humidity and sudden changes in temperature may be observed. If no maintenance treatment is received, through the periodic application of common and specific protective oil-based, the surface may take a silver-gray patina that can be easily removed with a light surface sanding down and subsequent polishing with a jute cloth. Small superficial stains due to oil or other food products must be removed promptly, before the wood can absorb them in depth, sanding down the affected surface and then polishing it with a jute cloth.

Ottenute mediante la tessitura di materiali sintetici studiati per permette di essere usata all'esterno.
SI consiglia di evitare il contatto prolungato con sostanze grasse e/o coloranti che potrebbero venir assorbite dal materiale di rivestimento e dare luogo, di conseguenza, a macchie permanenti e rischiare di deteriorare la struttura del filato.
Si consiglia di evitare l'utilizzo di solventi.
Utilizzare acqua e detergenti liquidi non abrasivi con PH neutro ed incolori.

Obtained through the weaving of synthetic materials especially conceived outdoor use.
We recommend to avoid prolonged contact with greasy substances and / or dyes which could be absorbed by the covering material used and consequently cause permanent stains and risk to deteriorate the structure of the yarn. It is advisable it is suggested to avoid the use of solvents. Use water and non-abrasive liquid detergents with neutral PH and colourless.

Materials

Marmo / **Marble**

Travertino Silver

Travertino Titanio

White Carrara

Una delle pietre più pregiate e maggiormente impiegate in outdoor è sicuramente il marmo.
Il marmo, grazie alla sua particolare composizione e natura, è una pietra poco porosa e poco assorbente, durezza e resistenza, fanno del marmo una tra le pietre più pregiate e durevolli nel tempo.
La formazione del marmo avviene mediante un processo metamorfico di cristallizzazione: il carbonato di calcio, venendo in contatto con le rocce sedimentarie, dà vita ad un insieme di cristalli di calcite e minerali vari, i quali ne determinano il colorito.

Per mantenere la lucentezza del marmo e del granito è necessario detergere giornalmente le superfici: è sufficiente diluire il sapone neutro in acqua tiepida.
Le superfici dovranno essere strofinate per mezzo di una spugna o un panno morbido. Sarà sufficiente risciacquare con un panno umido, prestando attenzione a non lasciare i fastidiosi aloni di detergente.

Marble is certainly one of the most precious and used stones for the outdoor.
Marble, thanks to its particular composition and nature, is a little porous and not absorbing stone, hardness and resistance, making marble one of the most precious and durable stones in time.
The marble formation takes place by means of a metamorphic crystallization process: calcium carbonate, coming into contact with the sedimentary rocks, gives rise to a set of crystals of calcite and various minerals, which determine the complexion.

To maintain the shine of marble and granite it is necessary to clean the surfaces daily: it is sufficient to dilute the neutral soap in warm water.
The surfaces must be rubbed with a sponge or a soft cloth. It will be sufficient to rinse with a damp cloth, being careful not to leave detergent stains.

Il gres, grazie alle sue eccellenti proprietà fisiche e meccaniche, risulta essere ideale per uso esterno, essendo inattaccabile dagli agenti atmosferici e inalterabile ai raggi UV. Grazie all'utilizzo di materiali puri compattati tra loro ad alte temperature, senza l'aggiunta di resine sintetiche, il gres risulta molto resistente agli urti e alla flessione.

Per la pulizia dei in piani in gres si consiglia l'utilizzo di un panno inumidito con acqua e detergente neutro da risciacquare ed asciugare con un panno asciutto. Nella fase di lavaggio porre particolare attenzione al fine di evitare l'accumulo di sporco o calcare.

The stoneware, thanks to its excellent physical and flexural strenght, turns out to be ideal for outdoor use, being unaffected by atmospheric agents and unalterable to UV rays. Composed of pure ingredients compacted at high temperatures, without the addition of synthetic resin.

For the cleaning of stoneware tops it is advisable to use a damp cloth with water and a neutral detergent to be rinsed and dried with a dry cloth. During the washing phase, pay particular attention to avoid the accumulation of dirt.

Materials

Il gres, grazie alle sue eccellenti proprietà fisiche e meccaniche, risulta essere ideale per uso esterno, essendo inattaccabile dagli agenti atmosferici e inalterabile ai raggi UV. Il gres smaltato è ottenuto mediante la smaltatura manualmente di elementi in gres porcellanato.
Le variazioni di colore e di aspetto tra una superficie e l'altra sono imprevedibili e rappresentano il valore aggiunto e la peculiarità di una lavorazione interamente artigianale.

Per la pulizia dei in piani in gres si consiglia l'utilizzo di un panno inumidito con acqua e detergente neutro da risciacquare ed asciugare con un panno asciutto. Nella fase di lavaggio porre particolare attenzione al fine di evitare l'accumulo di sporco o calcare.

Stoneware, thanks to its excellent physical and mechanical properties, is ideal for outdoor use, as it is resistant to weather conditions and unaffected by UV rays. Glazed stoneware is produced by manually glazing porcelain stoneware elements.
The variations in color and appearance between different surfaces are unpredictable and represent the added value and uniqueness of a completely handcrafted process.
For the cleaning of stoneware tops it is advisable to use a damp cloth with water and a neutral detergent to be rinsed and dried with a dry cloth. During the washing phase, pay particular attention to avoid the accumulation of dirt.

Pietra lavica / **Lava stone**

Vulcan grey | **Prussian blue** | **Passion red** | **Corallo** | **Fog green**

Lava è un materiale robusto, consistente e di facile manutenzione realizzato smaltando artigianalmente lastre in pietra lavica o in gres. È un processo che unisce tecnologia e tradizione artigianale in cui vengono sapientemente bilanciati tempo e temperatura, donando inaspettate particolarità alla superficie. I colori, trasparenti e luminosi, applicati con processi manuali, permettono di cogliere, fra le loro sfumature, la porosità e le imperfezioni della pietra. Le lievi variazioni di spessore e tonalità di colore sono quindi valori di prestigio che rendono ogni prodotto unico.

La cottura ad alte temperature ed il vetro, completamente riciclato tramite un esclusivo processo di frantumazione e macinazione, migliora la superficie nelle sue caratteristiche tecniche, capace di rispondere a tutte le esigenze del vivere l'esterno.

Lava is a robust, consistent and easy-to-maintain material made by hand-glazing lava stone or stoneware slabs. It is a process that combines technology and traditional craftsmanship in which time and temperature are wisely balanced, giving unexpected peculiarities to the surface. The colors, transparent and bright, applied with manual processes, allow to capture, among their shades, the porosity and imperfections of the stone. The slight variations in thickness and color shades are therefore prestige values that make each product unique.
The firing at high temperatures and the glass, completely recycled through an exclusive crushing and grinding process, improves the surface in its technical characteristics, able to meet all the needs of outdoor living.

Materials

Cemento / **Concrete**

Beige

Grey

Il cemento è un materiale naturale e, in quanto tale, durante il suo processo produttivo possono verificarsi leggere sfumature e variazioni delle tonalità dell'impasto cementizio, che caratteristica portante del materiale e della tecnologia.
Le fibre sono una componente dell'impasto cementizio e conferiscono al emento Ductal la sua estrema resistenza e flessibilità.
Se la finitura scelta è molto levigata, le fibre possono intravedersi sulla superficie e devono essere accettate come caratteristica intrinseca alla finitura.
I piani in cemento, specialmente di grandi dimensioni, non sono perfettamente planari a causa della natura stessa del materiale e della sua lavorazione artigianale.
Micro cavillature da ritiro, devono essere accettare come fenomeno naturale della lavorazione del materiale.
Piccoli fori e bolle possono apparire sulla superficie dei prodotti in cemento. Essi sono una naturale conseguenza del processo produttivo e parte integrante delle caratteristiche del materiale. Il loro aspetto e la loro quantità varia da finitura a finitura. I fori inferiori a 4 mm di diametro vengono lasciati tali, mentre di norma vengono stuccati quando superano il diametro di 5 mm.
Il cemento è un materiale poroso che tende ad assorbire i liquidi che entrano in contatto con la sua superficie, per questo va protetto con dei prodotti appositi; antidegrado ed antimacchia. È importante quindi evitare il ristagno dei liquidi sui piani e specialmente il contatto prolungato tra cemento e oggetti bagnati quali vasi, bottiglie, bicchieri o teli di plastica: una non corretta evaporazione dei liquidi può causare infatti macchie difficilmente removibili dai manufatti.
Eseguire una pulizia superficiale con l'utilizzo di una soluzione di acqua e detergente neutro con basso contenuto di cera (es. prodotti per pavimenti in marmo). Per macchie insistenti, è possibile utilizzare soluzioni che contengono ammoniaca/candeggina diluita al 10%, cioè 1 parte di candeggina su 10 parti di acqua.

Cement is a natural material and due to its nature it may present slight nuances and variations in its combination, which is a key characteristic of the material and production technology.
Fibres are a component of the cement mix and give the Ductal cement its extreme strength and flexibility.
If the chosen finish is highly polished, fibres may be visible on the surface and must be accepted as an intrinsic feature of the finish.
Cement top and flat surfaces, especially the large ones, are not perfectly flat due to the nature of the material and its craftsmanship.
Micro shrinkage cracks must be accepted as a natural phenomenon of the material's workmanship.
Small holes and bubbles may appear on the surface of cement products. They are a natural consequence of the production process and an integral part of the material's characteristics.
Their appearance and quantity varies from finish to finish.
Holes smaller than 4 mm in diameter are left as they are, while they are normally grouted when they exceed 5 mm in diameter.
Cement is a porous material that tends to absorb liquids which get in contact with its surface, which is why it must be protected with special products such as anti wear sealant and Anti stain sealant. It is therefore important to avoid the stagnation of liquids on the surfaces and especially the prolonged contact between cement and wet objects such as vases, bottles, glasses or plastic sheets: incorrect evaporation of liquids can cause stains that are difficult to remove.
Clean the surface with water and neutral detergent with a low content of wax (for ex. marble flooring products). Stubborn stains can be cleaned by using a solution containing 10% diluted ammonia/bleach, which is 1 part bleach for 10 parts water.

Materials

HPL

Light metal

Dark grey

Corten

HPL è un durevole laminato compatto di ultima generazione, senza formaldeide che ha come caratteristica esclusiva quella di essere tutto colore, interno ed esterno.
Caratteristiche principali:
-interamente impermeabile
-ignifugo ed autoestinguente (classe B-s2, d0)
-altissima resistenza agli urti e ai graffi
-resiste all'uso di detergenti chimici aggressivi
-adatto al contatto diretto con gli alimenti
-non trattiene odori e sapori
-antibatterico, per rispondere ai più severi requisiti igienici.
In caso di sporco ostinato o incuria rimuovete prima con un panno morbido e umido eventuali depositi di materiale secco, senza sfregare per non rigare la superficie.
Utilizzate poi una spugna morbida non abrasiva e un detergente domestico, lavate la superficie con il detergente e risciacquate con acqua tiepida, quindi asciugate bene.

HPL is the latest generation compact laminate formaldehyde-free caractherized by a durable surface, with the unique feature of being full colour, inside and outside.
Main features:
- it is completely waterproof
- it is flame-retardant and self-extinguishing (class B-s2, d0)
- it has a very high resistance to impacts and scratches
- it s resistant to the use of aggressive chemical detergents
- it is suitable for direct contact with food
- it does not retain odours or flavours
- it is antibacterial, to meet the most stringent hygiene requirements.
In case of stubborn dirt or lack of care, we recommend to first remove any dry deposits with a soft and damp cloth, without rubbing to avoid scratching the surface.
Then use a soft, non-abrasive sponge and a household detergent, wash the surface with the detergent and rinse with warm water, at the end dry thoroughly.

Materials

Materiale elegante e contemporaneo, il vetro retroverniciato è ideale per applicazioni outdoor grazie alle sue eccellenti qualità estetiche e funzionali. Si tratta di un vetro float, generalmente temprato per aumentarne la resistenza, su cui viene applicata una vernice nella parte posteriore, successivamente protetta da uno strato di fissaggio. Il risultato è una superficie frontale completamente liscia, lucida e facilmente pulibile.
Grazie alla sua composizione, il vetro retroverniciato è resistente agli agenti atmosferici, ai raggi UV e all'umidità, mantenendo intatta la brillantezza dei colori e l'integrità della superficie anche in ambienti esterni.
Il vetro termoformato è un componente strutturale e d'arredo ottenuto tramite formatura a caldo. Lastre di vetro float vengono riscaldate in forni industriali a temperature comprese tra 600°C e 820°C; raggiunto lo stato plastico, il materiale diventa completamente modellabile, consentendo di imprimere sulla superficie qualsiasi geometria o texture tridimensionale, come l'esclusivo effetto "martellato". Un successivo ciclo di ricottura controllata elimina le tensioni interne, garantendo la perfetta stabilità meccanica del manufatto.
Per la pulizia ordinaria si consiglia l'uso di una soluzione di acqua e detergente neutro con basso contenuto di cera (ad esempio prodotti specifici per superfici in marmo). In caso di macchie persistenti, è possibile intervenire con soluzioni contenenti ammoniaca o candeggina diluita al 10% (1 parte di candeggina in 10 parti di acqua), avendo cura di risciacquare abbondantemente e asciugare con un panno morbido.

An elegant and contemporary material, back-painted glass is ideal for outdoor applications thanks to its excellent aesthetic and functional qualities. It is made from float glass, usually tempered to increase its strength, with a layer of paint applied to the back and protected by a sealing coating. The result is a perfectly smooth, glossy, and easy-to-clean front surface.
Thanks to its composition, back-painted glass is resistant to weather conditions, UV rays, and humidity, maintaining the brightness of its colors and the integrity of its surface even in outdoor environments.
Thermoformed glass is a structural and decorative component produced through a thermal molding process. Float glass sheets are heated in industrial kilns to temperatures ranging from 600°C to 820°C. Once the material reaches a plastic state, it becomes fully moldable, allowing any geometric shape or three-dimensional texture–such as the exclusive "hammered" effect–to be impressed onto its surface. A subsequent controlled annealing cycle eliminates internal stresses, ensuring the perfect mechanical stability of the final product.
Maintenance
For routine cleaning, we recommend using a solution of water and a neutral detergent with a low wax content (such as products for marble floors). In case of stubborn stains, it is possible to use solutions containing ammonia or diluted bleach (10% bleach solution: 1 part bleach to 10 parts water). Be sure to rinse thoroughly and dry with a soft cloth.

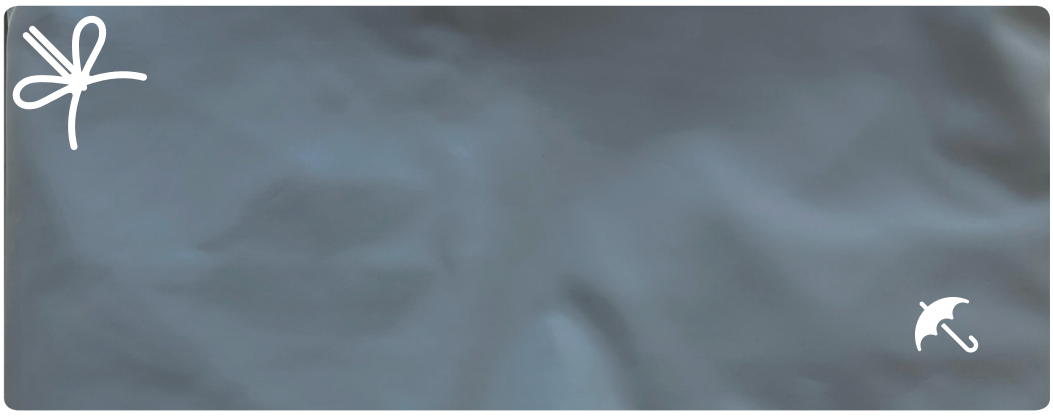
Cover



Tessuto tecnico per cover di protezione, composto da un supporto in 100% poliestere con spalmatura 100% poliuretano. Resistente, impermeabile e traspirante, è studiato per offrire una protezione efficace dei mobili mantenendo elevate prestazioni anche in condizioni di utilizzo outdoor.

Caratteristiche principali
Composizione: supporto 100% poliestere (PL), coating 100% poliuretano (PU)
Peso: circa 270 g/m² complessivi
Spessore: 0,5 mm
Altezza: ≥ 160 cm
Impermeabilità: ≥ 0,7 bar
Traspirabilità al vapore acqueo: ≥ 200 g/m²/24h
Elevata resistenza alla luce/UV: ≥ 7 Blue Scale
Resistenza allo sfregamento: ≥ 4 Grey Scale, sia a secco sia a umido
Resistenza all'abrasione: ≥ 50.000 cicli a secco / ≥ 5.000 cicli a umido
Resistenza alla flessione: ≥ 5.000 cicli
Lavabile a 40 °C
Resistente ai comuni detergenti e ad alcool al 20%

Technical fabric for protective covers, made from a 100% polyester backing with a 100% polyurethane coating. Durable, waterproof and breathable, it is designed to provide effective furniture protection while maintaining high performance in outdoor applications.

Main features
Composition: 100% polyester (PL) backing, 100% polyurethane (PU) coating
Weight: approx. 270 g/m² overall
Thickness: 0.5 mm
Width: ≥ 160 cm
Waterproofness: ≥ 0.7 bar
Water vapour permeability: ≥ 200 g/m²/24h
High light/UV fastness: ≥ 7 Blue Scale
Rubbing fastness: ≥ 4 Grey Scale, both dry and wet
Abrasion resistance: ≥ 50,000 dry cycles / ≥ 5,000 wet cycles
Flex resistance: ≥ 5,000 cycles
Washable at 40°C
Resistant to common detergents and 20% alcohol

CONDIZIONI GENERALI DI VENDITA

1. I colori, le tonalità dei tessuti, le dimensioni e i disegni dei prodotti presenti nel catalogo sono indicativi. La Talenti Spa ha facoltà di eliminare o modificare i modelli delle proprie collezioni senza alcun preavviso.

2. I prezzi consigliati dei modelli standard sono espressi nello specifico listino prezzi fornito dall'azienda i.e. Per quanto riguarda gli articoli su misura il preventivo verrà tempestivamente fornito dalla Talenti Spa dietro richiesta del cliente.
Per eventuale consegna con sponda idraulica verranno applicate le tariffe del nostro trasportatore.

3. L'acquirente è tenuto a controllare sempre la merce e ad indicare nel DDT la data di ricevimento, la persona che la riceve ed il timbro della ditta, nonchè le eventuali anomalie nel materiale.
La Talenti Spa accetterà esclusivamente reclami presentati entro 5 (cinque) giorni dal ricevimento della merce.

4. Gli ordini dovranno essere fatti per scritto utilizzando i codici, descrizioni e prezzo come da catalogo e listini prezzi relativi.

5. Condizioni di trasporto per Italia:
Porto franco per ordini superiori a € 1.800,00.
Per ordini da € 0 a € 500,00 contributo fisso € 60,00.
Per ordini da € 500,00 a € 1800,00 contributo dell' 8%.
Per le isole porto franco per ordini superiori a € 3.500,00.

Condizioni di trasporto per l'estero:
Il listino ex works è da intendersi franco fabbrica.
La Talenti Spa con la consegna al vettore in nessun caso risponde dei rischi a cui la merce è sottoposta durante il trasporto.
Quindi eventuali ammanchi, rotture, deterioramenti o manomissioni sono a totale carico dell'acquirente.

6. Per ogni controversia è competente il foro di Terni (Italia).

INFORMATIVA AI SENSI ART.13 D. Lgs. n. 196/03

"Codice in materia di protezione dei dati personali"
Il trattamento dei dati personali si svolge nel rispetto dei diritti e delle libertà fondamentali, con particolare riferimento alla riservatezza e al diritto alla protezione. Il trattamento viene effettuato per adempiere ad obblighi amministrativo-contabili e fiscali e per l'esecuzione degli obblighi contrattuali. I Vs. dati possono essere comunicati, oltre che a tutti gli incaricati del trattamento all'interno dell'azienda, a consulenti amministrativi, contabili e legali, ad Istituti Bancari.
Titolare del trattamento è TALENTI Spa avente sede legale in Strada Amerina km 4,5, 05022 - Amelia (Tr) - Italy Al Titolare del trattamento ci si potrà rivolgere per far valere i diritti previsti dall'art. 7 del D.Lgs 196/03.

GENERAL CONDITIONS OF SALE

1. The colours, drawings and sizes of the products in this catalogue are approximate. Talenti Spa reserves the right to discontinue or change the models in its collections at any time without advance notice.

2. The prices of the standard models are expressed in the specific price list that Talenti Spa will provide. Concerning customized items the offer will be immediately made and provided by Talenti Spa on request of the customer.
Prices are ex works. In case of delivery with hydraulic bank the quotations of our freight forwarder will be applied.

3. The purchaser is always required to inspect the goods and indicate on the transport document the date of receipt, the person who received it and the company's stamp, as well as any anomalies found in the material. Talenti Spa will not accept any claims presented more than 5 (five) days after receipt of the goods.

4. Orders must be in writing using the codes, descriptions and prices shown in the catalogue and price lists.

5. Transport terms in Italy:
Free port for orders over € 1.800,00
For orders from € 0 to € 500,00 a € 60,00 transport fee will be charged
For orders from € 500,00 to € 1.800,00 a 8% transport fee will be charged
For islands free port for orders over € 3.500,00
Transport terms outside Italy:
The ex-works price list is to be intended ex-factory
Once Talenti Spa has delivered products to the carrier, it is no longer responsible for risks these are subject to during transport. The purchaser is thus totally responsible for any missing pieces, breakage, deterioration or tampering.

6. The Court of Terni (Italy) will be exclusively competent for any disagreements.

NOTICE UNDER DL 196/2003, THE PRIVACY LAW

Your personal information will be handled with respect for your rights and fundamental liberties and with particular reference to confidentiality and the right of protection. Your information will be handled to fulfil our administrative, accounting and tax obligations and to fulfil our contractual obligations. In addition to the company's employees assigned to handle your information internally, it may also be communicated to administrative, accounting and legal consultants and to banks.
The owner of the information for handling purposes is Talenti Spa, which is located at Strada Amerina km 4,5, 05022 - Amelia (Tr) - Italy
You may contact the owner to assert your rights under article 7 of DL 196/2003.
